OVERVIEW

To provide additional options for students, online, self-paced developmental math courses were designed. Student success in these courses and in subsequent courses was tracked.

Due to the needs of the students a software that did not rely on an internet connection was essential.

To address student questions in this online format, the discussion board and other communication tools within Hawkes software were utilized.

41% Increase in the number of students who graduated
41% increase in students who graduated after passing a developmental math course using Hawkes. This contributed to a 21% increase in the total number of students who graduated the university.

92% Success rate in self-paced courses using Hawkes
The success rate for all courses using Hawkes at the university was 88%. More specifically, the success rate for the redesigned self-paced courses was 92%.

STUDENTS SUCCESSFUL IN FOLLOW-UP COURSES

“I really think that the Hawkes program is wonderful. I have always been a C student in math until this program & now I am an A student!”
